

<b>Project Title:</b> SAAS: the new frontier of learning	
<b>Start Date:</b> 30/3/2019	<b>End Date:</b> 25/05/2019
<b>Project Manager:</b> Gianni Bellini	
<b>Project Sponsor:</b> ITI. MARCONI	
<b>Customer:</b> ITI. MARCONI	
<b>Users:</b> ITI. MARCONI Students	
<b>Stakeholders and Expectations:</b> Team: It had clear explanations of how the course should have been, the team expected constant collaboration between stakeholders, which subsequently occurred as essential for the development of the project. Professor Bellini: He chose moodlecloud as a platform because it was an excellent solution and that was right for us. ITI. MARCONI: It guarantees the visibility of the course to all students of the school who need it.	
<b>Purpose (Problem or opportunity addressed by the project):</b> Students who decide to take advantage of our course will be able to reach B2 English proficiency level for free. During the development of the project, no particular problems were ever encountered.	
<b>Goals and Objectives:</b> The main objective is to provide school students with a platform where they can increase their English language skills and learn from our lessons in a simple and intuitive manner.	
<b>Schedule Information (Major milestones and deliverables):</b> 30/03/2019 - Starting of the project 04/04/2019 - Project Charter Approved 10/04/2019 - Development of the course structure 15/04/2019 - Implementation of the lessons 21/04/2019 - Implementation of the mini-quizzes 28/04/2019 - Writing of User Guide and System Administration Manual 25/05/2019 - Product released	
<b>Financial Information (Cost estimate and budget information):</b> The project was done at school for training purposes. In addition, a free online platform was used so there no budget was needed to develop the course.	

**Project Priorities and degrees of freedom:** The main priority was to follow all the indications provided by the English teacher Laura Rossi, so that the course could have been as instructive and effective as possible.

**Approach:** Iterative and incremental is planned. Feedback will be used from one iteration to the next. The first iteration will focus on basic functionality of the app. Subsequent iterations will build upon that and incorporate more features as time allows.

**Constraints:** The scrum methodology was used for the correct management and organization of the work. The team followed iteration and review cycles with each initially decided sprint.

**Assumptions:** We had the availability of some school laboratories for the development of the project. We used ITI MARCONI devices during the lessons dedicated entirely to the creation of the course.

**Success Criteria:** The project will be considered a success if (1) the team delivers an We had the availability of some school laboratories for the development of the project. We used ITI devices. MARCONI during the lessons dedicated entirely to the creation of the course, and (2) The English teacher will be satisfied with what has been done.

**Scope:** produce an online English course to help students who have difficulties in the grammar of the English language.

**Risks and obstacles to success:** One risk, which was subsequently bypassed, was the discrepancy in the knowledge of English within the team. Everything was subsequently checked by teacher L. Rossi, who guaranteed the correctness of the exercises.
