1 Introduction

The Moodle platform has given the possibility to our team to create an English course in a very short time, precisely because it is an IT environment for course management. Project constraints will be included in separate documentation. The Software Project Management Plan will give specifics on project budget and schedule. A separate Test Plan document will address test specifications and procedures.

2 Quick Start Guide

1. The login screen will be brought up.

2. Enter your E-Mail and Password.

3. Tap the Login button.
4. The English Course will be displayed.

The screenshot displays the user interface of the Campus Marconi system. At the top, a navigation bar includes the site logo, language selection (ENGLISH (EN)), and user information (Gianni007 Bellini007). A sidebar on the left provides quick access to various features: Dashboard, Site home, Calendar, Private files, My courses, and CorsoDiRecupero. The main content area is divided into several sections:

- Course overview:** Displays a list of courses, including 'English Course FCE' and 'Corso di Recupero'. It includes filters for 'All (except hidden)' and 'Last accessed', and a 'Show 12' dropdown.
- Private files:** A section for managing private files, currently showing 'No files available' and a link to 'Manage private files...'.
- Timeline:** A section for tracking activities, currently showing 'No upcoming activities due'.
- Online users:** A section showing the number of online users (2 online users last 5 minutes) and a list of active users (Gianni007 Bellini007, Gianni Bellini).
- Latest badges:** A section for displaying the latest badges.

3 System Requirements

To run this course is needed a simple web browser. The platform is online so there is no need of high performance hardware on the user pc.
